

Welcome to our quarterly news updates. We have had a busy quarter and items worthy of note are our increased expansion via acquisition, new service offerings, new website, team expansion and delivery of new vehicles to our fleet.

During the summer months Firestop Services acquired Fearl Fire Limited, Scunthorpe which has enabled us to expand our service offering to the North of Lincolnshire for fire extinguisher servicing and sales, fire safety training, fire risk assessments and fire alarm testing and maintenance

In a proactive move Firestop Services have now expanded our service provision and now offer a more complete fire safety solution for clients. These new services include maintenance of dry risers in high rise buildings, passive fire protection and the provision of fire safety training at our Fortuna Business Centre facilities.

Firestop Services has found over the years that one recurring invisible fire risk is the lack of fire stopping of service penetrations. Where contractors or in house maintenance operatives break through a compartment, or sub compartment wall it is generally left unchecked. We now undertake fire surveys of accessible passive fire protection provision, identify these “invisible risks” and if engaged to do so we can supply and install all types of fire stopping systems and passive fire protection.

Since refreshing our website, which can be found at www.firestopservices.co.uk, we have experienced an increase in web traffic and enquiries as a result of the more modern web interface. Clients are now able to complete online enquiry forms, follow us on Facebook, LinkedIn and Twitter where we post regular updates.

Since our last news update our team has grown again and with the expansion we have now employed a Business Development Manager and more Fire Engineers who further demonstrate our regional ambitions.

Since the launch of Interaktive we have had a positive uptake. Our clients are assured that this system is a secure online management collaboration programme which contains the data of all the key services Firestop provides for each client along with documentation, certification, site locations, asset registers and contact details. The system time-manages the client’s schedule of service which can create efficiencies by ensuring no clients certification and inspection is out of date.

Finally, after a combined mileage of close to a million miles on our vehicles we have recently taken delivery of a new fleet with refreshed livery but retaining our trusted and distinctive company logo.

We are delighted to report new associations that have been added to our portfolio this year such as Brocklesby Estates, ConocoPhillips, Rockscape Energy, Babcock International, R G Carter, BBI Group and we look forward to rewarding and successful associations for many years.

Andy Cooling
